

Project „GreenAgri“

Environmentally-friendly Management of Organic Fertilizers in Agriculture

Roomet Sõrmus, Chairman of the Board

Estonian Chamber of Agriculture and Commerce

Jelgava, 16.02.2016

Eesti Põllumajandus-Kaubanduskoda
The Estonian Chamber of Agriculture and Commerce

Project goals

- ❖ Reduced nutrient losses from agriculture in Baltic States through introducing and testing innovative and efficient practices in management of organic fertilizers
- ❖ Project „GreenAgri“ is first joint effort of Estonian and Latvian farmer organizations supporting the improvement of the Baltic Sea environmental status
- ❖ The skills and knowledge of ca 300 farmers from two countries will be improved in the field of environmentally-friendly management of organic fertilizers

Main activities and budget

- ❖ Implementation of pilot programme for testing innovative methods and technology in 20 pilot farms in close co-operation of agri-environmental experts
- ❖ Conducting comparative survey of technology available in Baltic Sea Region and economical analysis of new regulations
- ❖ Organizing training programme, demo days, study visits, info seminars and conferences for farmers and rural advisers
- ❖ Regular workshops with governmental organizations and R&D organizations

Project period: 48 months, 01.09.2015-31.08.2019

Partners: Estonian Chamber of Agriculture and Commerce and Latvian Farmers Parliament

Budget: 859 491 EUR

Project is part-financed by ERDF using the support of Central Baltic Programme 2014-2020
